To Whom It May Concern,

The Alzheimer's Disease Resource Center, Inc. has been working with SeniorCare Companions since 2004 and continues to use this agency as a referral source for our clients, as well as for assistance with many of our own programs.

Dr. Bernie Sengstock and his staff are dedicated to providing quality care for their clients helping to minimize the challenges faced by the primary caregiver(s). SeniorCare Companions provides an extensive vetting process for all of their staff members, including extensive staff training. This training ensures that when a companion comes into your home, and assisted living residence, hospital or nursing home, they have the necessary skills to ensure that your loved one gets the highest quality of care possible.

SeniorCare Companions has provided care for many of our clients, and they provide companions for our Respite room at our Annual Alzheimer's Disease Education Conference and Expo. SeniorCare Companions also provides assistance for our off-site Equine Therapy and Art programs, as well as our Respite room for our Caregiver Support Group Holiday Luncheon.

I feel most confident in recommending SeniorCare Companions to you, as ADRC has a long history with this agency; we know the quality of work and the quality of the individuals they hire.

If you would like more information, please feel free to call me on my direct line at (631)820-8068.

Sincerely,

Alzheimer's Disease Resource Center, Inc.

Robin Marks

Executive Director/CEO
